

## How to speed up your pad

RECOMMENDATION	Go to Settings >			ACTION
<b>Delete Unused Apps</b>	General >	iPad Storage >	Select App >	at bottom select: Delete App
<b>Move Downloaded Music Storage</b>	General >	iPad Storage >	Scroll down and tap on Music.	If Documents & data is a lot - you may want to offload and or delete just from this iPad some or all of the music
<b>Stop Background App Refresh</b>	General >		Background App Refresh >	Turn off
<b>Change Your Graphics Settings</b>	General >	Accessibility >	Reduce Transparency >	Turn on
			Reduce Motion >	Turn on
<b>Turn Off Siri &amp; Search</b>	General >	Siri & Search >	Search >	Turn off
			Look Up >	Turn off
			Lock Screen >	Turn off
<b>Delete all Safari's Cache, Cookies &amp; Web History</b>	Safari >		Scroll down to >	Clear History and Website Data
<b>Delete All Browsing Data of One Specific Website</b>	Safari >	Advanced >	Website Data >	Edit and select red minus sign
<b>Clear your cookies and keep your history</b>	Safari >	Advanced >	Website Data >	Remove All Website Data
<b>If all else fails: Factory Reset your iPad</b>	General >	Reset >	Tap on Reset All Settings >	Resetting to Factory Settings will wipe all your settings but not the data and apps on your device. You'll need to restore all your Settings to the way you prefer them <b>Do not select: Erase All Content and Settings</b>
<b>Last Option: Wiping the iPad</b>	General >	Reset >	Tap on Reset All Settings >	Tap Backup then erase
<b>Move Photos &amp; Videos to Storage</b>	if you delete photos from your iPad, they'll also be deleted from iCloud			uploadi them to an external hard drive or computer not connected to your iCloud account
<b>Maintenance</b>	Close Unused Running Apps/Games			
	Restart your iPad at least every other day
